

## **CNC Swiss Screw Machines**

- (2) Citizen CinCom Model B12 Type 1
  - 1/2" Bar Capacity
  - Front end working capability for drilling, tapping and boring.
  - Stationary guide bushings for long parts.
  - Equipped with Magazine Barloaders for High production.
  
- (5) Citizen CinCom Model B12 Type 5
  - 1/2" Bar Capacity
  - Front end working capability for drilling, tapping and boring.
  - Rotary guide bushing for higher speeds, reducing cycle times.
  - Subspindles for burr free cutoffs and back working capabilities.
  - Equipped with Magazine Barloaders for High production.
  
- (3) Citizen CinCom Model B12 Type 6
  - 1/2" Bar Capacity
  - Front end working capability for drilling, tapping and boring.
  - Rotary guide bushing for higher speeds, reducing cycle times.
  - Subspindles for burr free cutoffs and back working capabilities.
  - Live tooling for cross drilling, milling
  - Equipped with Magazine Barloaders for High production.
  
- (1) Citizen CinCom Model A20 Type 5
  - 3/4" Bar Capacity
  - Front end working capability for drilling, tapping and boring.
  - Rotary guide bushing for higher speeds, reducing cycle times.
  - Subspindles for burr free cutoffs and back working capabilities.
  - Live tooling for cross drilling, milling
  - Equipped with Magazine Barloaders for High production.
  
- (1) Citizen CinCom Model L20 Type 5
  - 3/4" Bar Capacity
  - Front end working capability for drilling, tapping and boring.
  - Rotary guide bushing for higher speeds, reducing cycle times.
  - Subspindles for burr free cutoffs and back working capabilities.
  - Live tooling for cross drilling, milling
  - Equipped with Magazine Barloaders for High production.

(1) Citizen CinCom Model L20 Type 7

3/4" Bar Capacity

Front end working capability for drilling, tapping and boring.

Rotary guide bushing for higher speeds, reducing cycle times.

Subspindles for burr free cutoffs and back working capabilities.

Live tooling for cross and face drilling, milling

Equipped with Magazine Barloaders for High production.

(1) Citizen CinCom Model L20E Type IX

3/4" Bar Capacity

7 Axis machine

16 Live tools for both cross and face working on both front and back sides

Equipped with Magazine Barloader for High production.
